## Price quote for a 10kW photovoltaic container for base stations in Australia

How much does a 10kW Solar System cost in Australia?

According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt- or about \$9,130 after the federal STC rebate is deducted. The below table shows the breakdown of the average costs by each major state capital in Australia, which we update every month:

How much does a 10kW Solar System cost in 2025?

You should get about \$3,500 in STCs (AKA the solar rebate). So expect to pay about \$8,500 - \$13,000 out of pocket costs for a good quality 10kW solar system in 2025, professionally installed by a reputable installer. That's quite a price range - the reason is the cost of a 10kW solar system will depend on the type of components used.

How much does a solar system cost in Australia?

Solar Choice publishes a monthly Solar PV Price Index that tracks average pricing trends in every capital city in Australia. According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt- or about \$9,130 after the federal STC rebate is deducted.

What is a 10kW Solar System?

10kW solar systems are on the large side for residential installations (where 5kW to 6.6kW is much more common). So as mentioned above, 10kW systems tend to be most appropriate for homes or businesses with significant amounts of daytime electricity consumption above 40kWh per day.
