
Product Cell 21700

Who makes 21700 battery cells?

In the research and production of 21700 battery cells, BAK Battery has consistently maintained an advanced layout and technological leadership. They continuously break through the capacity ceiling of 21700 battery cells, successively releasing and mass-producing 21700-5.0Ah and 21700-5.3Ah battery cell products.

Why is a 21700 cell a good choice?

The larger size of the 21700 cell enables it to store more energy, making it ideal for applications requiring high power capacity, such as electric vehicles and industrial battery packs. Its dimensions also contribute to better thermal management, ensuring safer and more efficient operation.

How big is a 21700 cell?

The 21700 cell stands out due to its standardized dimensions of 21mm in diameter and 70mm in length. These measurements make it larger than the widely used 18650 cell, which measures 18mm by 65mm. This increase in size allows the 21700 to deliver higher energy storage and improved performance.

Are 21700 battery cells a good choice?

In the past two years, 21700 battery cells have gained widespread use in the small power market due to their higher energy density and overall cost advantages compared to traditional 18650 cells.

The 21700 lithium battery cell has emerged as a pivotal innovation in energy storage solutions. With its 21mm diameter and 70mm length, this cylindrical power source ...

The Product Identified in this Product Specification ("Cell" or "Product") is an industrial component part that is intended to be used ONLY for use in Battery Packs with ...

In the research and production of 21700 battery cells, BAK Battery has consistently maintained an advanced layout and technological leadership. They continuously break ...

Molicel, the Taiwan-based manufacturer known for producing some of the most trusted high-power lithium-ion cells, is expanding its 21700 product line.

70 g (Max) The information contained herein is for reference only and does not imply a performance guarantee or a product warranty. Specifications and characteristics are ...

In the research and production of 21700 battery cells, BAK Battery has consistently maintained an advanced layout and technological leadership. They continuously break through the capacity ceiling of 21700 ...

The 21700 battery, with 21mm diameter and 70mm length, offers 3.7V voltage and up to

5,000mAh capacity, making it ideal for high-power applications.
