Why do HVAC systems use isolator switches in Malaysia?

In HVAC systems across Malaysia, isolator switches are used to isolate individual components, such as air handling units, chillers, and fans, for maintenance or repair. They ensure the safety of technicians working on the HVAC system by providing a visible break in the circuit.

What is an electrical isolator?

Electrical isolators like single or three-phase switches play a vital role in renewable energy systems, such as solar and wind power plants. They are used to isolate individual components, such as solar panels or wind turbines, from the electrical grid. This allows for safe maintenance and repair activities without disrupting the entire system.

What is an isolator switch?

They provide a means of isolating circuits or equipment for maintenance, repair, or safety purposes. Isolator switches are designed to interrupt the flow of electrical current and provide a physical barrier to prevent accidental contact with live electrical parts.
