
Recommendation of solar container system by Marseille Power Supply Bureau

How does the port of Marseille use photovoltaic energy?

In parallel, the Port of Marseille Fos is working to develop photovoltaic energy production by equipping the roofs of hangars and warehouses. Today, the Port supplies ships with power from the national ENEDIS network. The electricity is guaranteed 100% renewable, thereby ensuring the maximum environmental benefit.

Is Marseille a 100% renewable port?

The electricity is guaranteed 100% renewable, thereby ensuring the maximum environmental benefit. With its photovoltaic roofs, over the next few years the Port aims to produce 100% self-generated energy, fed into the internal network. LNG-powered cruise ships have been calling at Marseille since 2019.

How does the port of Marseille Fos protect biodiversity?

Since 2007, the Port of Marseille Fos has committed to a policy of preserving biodiversity through the management and protection of its natural areas covering over nearly a third of its territory in the west of the port area.

Is Marseille Fos a good port for Ops deployment?

With its high-voltage OPS coverage across multiple terminals and its EUR169M investment by 2028, Marseille Fos ranks among the leading European ports for OPS deployment and a reference in scalable decarbonization infrastructure globally.

CENAQ (Connexion Electrique des Navires A Quai / Onshore Power Supply) addresses the emergency to reduce air pollution, greenhouse gas emissions and noise generated by ships at
