
Resignation rate of Icelandic energy storage new energy company

What is Iceland's climate strategy?

The strategy highlights Iceland's goal to be an international leader in geothermal, renewable energy and CCUS. It outlines how Iceland can meet the United Nations 2030 Sustainable Development Goals (SDGs), and Iceland's 2030 Paris Agreement commitments. This document builds on Iceland's 2020 Climate Action Plan.

When will the sustainable Iceland strategy be released?

The Sustainable Iceland strategy has wide representation, with consultation beginning in May 2023. The draft was published in February 2024 allowing for several months of feedback. Outcomes will be measured against the SDGs and 40 wellbeing indicators.

Is Iceland a sustainable country?

Consideration is made for an economically sustainable society and emphasises Iceland's advantage in sustainable energy production, energy exchange, energy efficiency, and efficient use of multiple energy sources. It outlines Iceland's goal of 55 per cent reduction in net greenhouse gas emissions by 2030 and carbon neutrality by 2040.

Is Iceland a leader in geothermal & renewable technology?

Iceland sees itself as a rising world leader in geothermal, renewables and associated technology. This leadership goal is highlighted by the 'Sustainable Iceland' strategy released in July 2024.

Iceland is accelerating its sustainable energy transition by closing its last coal plant. Discover how this move impacts energy grid stability and its 2040 carbon neutral goal.
