# San Jose Uninterruptible Power Supply Plant

Why should you install a power plant ups in an 811 call center?

Power plant UPS keep operations up while a UPS installed in an 811 call center can help keep lines open so utility lines aren't damaged by misinformed digging. Whatever point in your power distribution needs support, Mitsubishi Electric can help.

Why do you need a power plant ups?

Power plant UPS are also used to provide an extra layer of protection for security alarms and communications in utilities and their respective network of remote substations. Uninterruptible power supplies can offer protection to your equipment and essential service throughout your infrastructure.

Why should you choose Mitsubishi Electric uninterruptible power supplies?

At 99.9995%, Mitsubishi Electric Uninterruptible Power Supplies achieve the highest equipment reliability among all UPS suppliers, ensuring you - and your customers - are protected against downtime 24/7/365.

How can a power plant reduce downtime and equipment damage?

You can reduce the chance of downtime and equipment damage with an uninterruptible power supply at the source, as well as downstream installations that keep relay stations up and running. Energy generated in power plants is transmitted great distances via overhead lines and distributed among scattered substations.
