
Seoul 50 MW solar project

How much energy does Solar City Seoul generate?

Including the new supply of 52 MW of solar power installed in 2018 and a total installation capacity of 210 MW, the Solar City Seoul project has generated 237,805 MWh of annual energy. It has also reduced greenhouse gases by 109 tonnes of CO₂ and fine particulate matter by 27.6 tonnes.

What is the Solar City Seoul project?

South Korea's capital is one of the world's most innovative smart cities and is currently engaged in a number of initiatives pushing to make it greener and more sustainable. One of them is the Solar City Seoul project, which aims to deploy solar panels to 1 million households in order to achieve 1 GW of installed solar PV.

How many solar projects does peak energy have in Asia?

Peak Energy has realised more than 400 MW of solar projects across 13 Asian countries. At the end of last year, the company joined forces with South Korea-based Topinfra to develop over 500 MW of solar and battery storage capacity in the Asian country.

How did Seoul achieve 100 percent energy self-sufficiency?

Seoul organised school campaigns in which students were selected to be leaders in energy saving and volunteering activities. The city established the Seoul Energy Dream Centre that would achieve 100 per cent energy self-sufficiency and serve as a learning centre for students and other residents.
