## Seoul Communications bids for 5G base station construction

How much did South Korea pay for misleading 5G advertising?

In May, South Korea's Fair Trade Commission collectively fined the country's three carriers about \$24.8 million for allegedly using misleading advertising that exaggerated the speed of their 5G networks at their launch.

How many 5G subscribers are there in South Korea?

As of August 2022, there were 24.53 million 5G subscribers in South Korea, accounting for around 33% of all mobile subscriptions in South Korea. Perhaps more importantly, 5G networks are now carrying roughly 70% of all mobile data traffic in the country.

Does KT have a 5G network in South Korea?

As of 2024, KT is the only telecom provider in South Korea to have established a nationwide 5G SA network. KT launched its SA 5G service in 2021, becoming the first South Korean operator to do so. SK and LG U+ are operating their communication networks based on 5G NSA (Non-Standalone).

How does 5G work in South Korea?

South Korea's main telecom firms developed their public 5G networks on the 3.5-gigahertz band, a mid-frequency band. At the same time, 5G can be enabled on the high-frequency bands supporting millimeter wave, the type touted at 5G's inception that can provide more-extreme boosts in speed.
