## Solar Light 30W Installation

Who can install my 30kW solar system?

Any licensed general, electrical, or solar contractor can install our 30kW solar kits. If you choose to hire a contractor, expect to pay approximately \$1.00 per watt for labor, wire, conduit, fittings, breakers, and other miscellaneous electrical components to complete the installation.

Are solar streetlights a good option for outdoor lighting?

These systems offer a clean, cost-effective solution for outdoor lighting. Whether you're illuminating streets, parking lots, parks, or pathways, solar streetlights eliminate the need for expensive underground wiring and reduce electricity bills. However, the success of a solar street lighting project largely depends on proper installation.

How do I choose a solar Streetlight?

Tools for Survey Use tools like solar pathfinders, light meters, and mapping software to analyze the site accurately. Choosing the correct solar streetlight is a critical step that directly affects the efficiency, durability, and performance of your lighting project.

How long does it take to install a solar system?

All-in-one models typically take 1 to 2 hours to install, while split-type systems may take 3 to 5 hours. Q2: Do I need an electrician for the installation?

Before installation, please ensure the light pole foundation is solid enough to withstand the lighting fixture. Position the lighting fixture to optimize its exposure to sunlight. ...
