
Solar Panel Test Site

Where can I test my solar modules and components?

Conduct PV testing of your solar modules and components at our accredited photovoltaic testing laboratory. Solar certification services available.

Why do you need PV module testing & solar certification services?

This will reassure every stakeholder that the products are ready for use. Beyond leading to international market access and global recognition, PV module testing and solar certification services identify potential improvements in your manufacturing process. These improvements enable you to increase production quality and PV safety.

Do solar panels need safety testing?

Safety testing for the evolving solar industry is as necessary today as it was 125 years ago when electric lighting became mainstream. Depending on your place in the value chain, there are several types of testing for both photovoltaic (PV) panels and peripheral equipment.

What is a solar panel test?

This test evaluates the materials used in solar panels, such as adhesives and encapsulants. It measures things like strength, flexibility, and how well the materials conduct electricity or handle heat. The results help manufacturers ensure quality and reliability during production and over the module's lifespan.

Mobile on-site testing eliminates the need to send solar panels to a distant laboratory to minimize power plant downtime and maximize profitability. We provide you comprehensive on-site ...

China Quality Certification Centre (CQC) is the first certification body authorized by the Chinese government to carry out green building materials product certification for PV ...

This test simulates the physical stresses a solar panel experiences, like wind, snow, or handling during installation. By applying alternating forces to the panel, it checks if ...

Through testing, inspection and certification, we help you increase confidence in the reliability of your renewable energy technology. Safety testing for the evolving solar industry is as necessary today as it ...

PV services from TÜV SÜD fulfil your solar testing and solar certification needs, helping your photovoltaic products achieve safety, quality, and regulatory compliance in national and global ...

China Quality Certification Centre (CQC) is the first certification body authorized by the Chinese government to carry out green building materials product certification for PV modules and solar PV systems, and ...

Sterling and Wilson Solar offers Mobile PV Module Testing Lab with On-site flash, EL, I-V array testing of strings/modules, Visual inspection of PV modules & TUV Certified - Certified to IEC 60904-9 Ed2 by TUV Rhineland.
