How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel costs, and a host of other related topics.

What is a solar inverter?

A solar inverter or photovoltaic (PV) inverter is a type of power inverter that converts the variable direct current (DC) output of a photovoltaic solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network.

Does Sol-Ark have a solar inverter?

Sol-Ark is known for being designed and assembled in the USA, and offers phone and email support 7 days a week from its U.S.-based team. The company offers three inverter sizes that can output 5, 8, and 12 kW. Each inverter can accept more PV power than its rated power output, and can be connected to virtually any battery on the market.
