
Solar curtain wall in Johannesburg South Africa

What are curtain walling systems?

Curtain walling systems are increasingly specified in the world's most modern commercial and industrial buildings. In fact they have come to be expected of many buildings today, not only because of their numerous practical advantages but also because of their appearance. Curtain walls are installed on the outside of a building, on their own frame.

Solar Pack SA is a leading provider of solar energy solutions in Johannesburg, dedicated to delivering sustainable and cost-effective power alternatives for homes and businesses.

How do curtain walls work?

Curtain walls are installed on the outside of a building, on their own frame. Though the frame is secured to the main building's slabs at certain points, curtain walls stand entirely on their own structure. They are installed from the outside and the effect is an outside view that can almost look like seamless glass.

Is curtain walling a good investment?

Curtain Walling is Lightweight - Due to it being non-structural, the material used to make it can be lightweight. This reduces the costs of production and construction, making it an extremely worthy investment. The additional use of glass within curtain walling brings the added advantage that natural light can flow throughout buildings.
