Should you install a solar plus storage energy system?

The main advantage of installing a solar plus storage energy system is that it gives you the ability to use solar electricity even when the sun isn't shining. When you install a solar panel system without a battery, excess electricity that your system generates is sent back to the grid.

Should you install a solar panel system without a battery?

When you install a solar panel system without a battery, excess electricity that your system generates is sent back to the grid. With a solar battery, that energy can be stored and drawn on when the sun goes down, and you'll only need to draw and pay for energy from the grid when your battery is depleted.
