# Solar panels in rural Lyon France

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How many French homes have solar panels?

Solar panels have so far been installed in only about 600,000 French homes, or less than 2 per cent of the country's housing stock. However, the market is growing fast. The boom is helping answer two questions currently resonating well beyond France: what kind of homes are best suited to solar?

How can France reduce the cost of installing solar panels?

Simplify the state's administrative procedures around putting panels on homes, cut VAT on it, and facilitate interest-free loans to help bear the cost of installation, advises Gaidon. DualSun's Mouterde says that, above all, France needs more qualified panel installers.

What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.
