# Solar water pumps in South Africa

Should you invest in solar water pumps in South Africa?

Investing in solar water pumps is a smart, cost-effective decision for managing your water needs in South Africa. Whether you need to draw from a borehole, boost pressure, or use water stored in tanks, we can recommend an efficient water pump.

How much does a solar pump cost in South Africa?

In 2025, a 120m Solar Pump in South Africa costs R 7,820. This 540 Watt pump has a maximum flow rate of 2.1 m<sup>3</sup>/h. It can reach depths of up to 120 meters. A complete solar borehole solution in South Africa ranges from R60,000 to R120,000. The cost varies based on different factors. These systems come with a 12-month warranty for your peace of mind.

What is a surface solar pump?

Surface solar pump - these sit above ground and move water through pipes. They are handy for moving large quantities of water at a slow pace and are commonly found on farms or large irrigation systems where water needs to be moved from a lake or other body to fields or landscaping.

What is a solar water pump?

The solar water pump is typically used in domestic water supply, irrigation projects and for pumping water. A solar water pump uses the energy of the sun. The electricity is provided by one or more PV panels which are connected to the electrical pump system. Solar pumps are a great alternative to the conventional method of pumping water.
