# Spanish uninterruptible power supply equipment BESS

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

Does Spain need government support for Bess?

In Spain, significant growth has been seen in the BESS field over the last few years in the context of the National Integrated Energy and Climate Plan (PNIEC). However, there are still opportunities within the associated policies and regulations to unlock the necessary government support for these initiatives.

Why does Spain need a Bess system?

Spain's commitment to renewable energy integration is a primary driver for the growing demand for BESS. The push towards renewable sources, particularly solar and wind, necessitates efficient storage solutions to manage the variability and ensure grid reliability.

Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

In Spain, significant growth has been seen in the BESS field over the last few years in the context of the National Integrated Energy and Climate Plan (PNIEC). However, ...

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This transformation is driven by the ...

FRV and Jameel Energy have welcomed the announcement by the Spanish government that it is awarding EUR 163.646 million (US \$ 172.8 million) towards the development of new, innovative energy storage ...

FRV and Jameel Energy have welcomed the announcement by the Spanish government that it is awarding EUR 163.646 million (US \$ 172.8 million) towards the ...

Executive Summary: Battery Energy Storage Systems Market in Spain - Q4 2024 The fourth quarter of 2024 highlights significant developments in the Battery Energy Storage ...

In April 2025, Spain's installed BESS capacity is only 60MW, whereas the UK and Italy already have 5.6GW and 1GW of online BESS capacity, respectively. In this article, we discuss the ...
