What is xg17-25kw solar inverter?

XG17-25kW three-phase on-grid solar inverters are suitable for small household and small commercial power stations. With simple and fashionable appearance design and intelligent data monitoring platform

What are the advantages of MPPT inverter?

A 25kW Three Phase Grid Tie Solar Inverter with an MPPT inverter offers advanced MPPT tracking technology and a wide MPPT voltage range. Its no isolation transformer H6 full-bridge configuration results in a highest efficiency of up to 97%. It also provides over voltage, short circuit, overload, and overheating protection, as well as anti-islanding protection. Multiple inverters can be operated in parallel. The LCD display enables users to conveniently monitor main parameters.

How does a solar inverter work?

A 25kW three phase grid tie solar inverter works on a string scale. For example, if there are 30 solar panels in the array, they can be divided into 5 strings, meaning 6 solar panels per string. For each string, there will be a solar inverter, resulting in a solar system with multiple string inverters.
