
What are the outdoor wind power base stations in Tunisia

What is the energy sector in Tunisia?

Revised in November 2024, this map provides a detailed view of the energy sector in Tunisia. The locations of power generation facilities that are operating, under construction or planned are shown by type - including gas and liquid fuels, natural gas, hybrid, hydroelectricity, solar (PV and CSP), wind and biomass/biogas.

Can offshore wind power be used in Tunisia?

Offshore wind power has the potential to play a key role in achieving the future renewable energy targets due to the country favorable geographic location and coastline. However, there are currently no offshore wind farm projects nor experiences in Tunisia.

Where is wind energy potential found in Tunisia?

High wind energy potential are found in the northern part of Tunisia, but also in the central and southern regions. In northern and north-eastern areas, wind measurements revealed wind potential is significant for utility-scale wind farms implementation.

How many wind farms are there in Tunisia?

Wind power projects currently operating in Tunisia consist of three utility-scale wind farms producing a total capacity of 244 MW of electricity (STEG, 2020). The wind farms have been installed in the north of the country as indicated in Table 4.

In its contribution towards fighting climate change, Tunisia aims at reducing greenhouse gas emissions across all sectors through reducing carbon intensity in the country ...

Revised in November 2024, this map provides a detailed view of the energy sector in Tunisia. The locations of power generation facilities that are operating, under construction or planned are ...

Tunisia is targeting 35% of renewable energy in its energy mix by 2035, representing circa 3,800 MW. To achieve this objective the Tunisian Government is launching a series of solar and wind tenders across the ...

The Tunisian Solar Plan foresees a share of renewable electricity of 35% and an installed capacity of 4 GW by 2030. In 2021, Tunisia had achieved only 400 MW, with the majority stemming from ...

Tunisia is targeting 35% of renewable energy in its energy mix by 2035, representing circa 3,800 MW. To achieve this objective the Tunisian Government is launching a series of solar ...

Onshore wind: Potential wind power density (W/m^2) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area ...

Jebel Sidi Bchir Wind Farm is a 30MW onshore wind power project. It is planned in Bizerte, Tunisia. According to GlobalData, who tracks and profiles over 170,000 power plants ...
