# What is monocrystalline silicon for solar modules

Which arduino are you using? If your arduino uses 5v logic level (uno, mega 2560, leonardo, etc), the 5v solar panel will likely not be able to keep it stable. I would lean toward ...

I took some time on the internet to find a way to do an autonomous camera (bird camera trap). The goal is to take a photo each time a bird gets close to the bird feeder I am ...

Are the JMISC and JMEDIA high speed headers designed as a new standard to be used with upcoming boards as well, or are they just conveniently routing out what is ...

Hola a todos. En verano, me marcho de mi casa al menos un mes, y corto luz y agua. Necesito un sistema para el riego de las macetas que tengo en la terraza. Estoy en la ...

Beginners Question! Do I need something between esp32 board and solar panel? The ESP32-E has its own LIPO charging circuitry on board (TP4056X). I was hoping to add a ...

There are a lot of junk solar charging power packs out there. The cells inside are probably fine, but the solar panels are so small, they simply cannot do more than a slow trickle ...

I brought this low cost cell with no specification. :-) How can I tell if it is Monocrystalline, Polycrystalline or Amorphous solar cell? I was told different type has different ...
