# What is the SMA solar container energy storage system

What is SMA energy system large scale?

With the SMA Energy System Large Scale, you can store solar power. This enables you to manage peaks in demand, stabilize grid voltage and reduce energy costs considerably. The SMA Sunny Central Storage UP battery storage system will increase the efficiency of your PV power plant.

What is SMA Sunny central storage up battery inverter?

The SMA Sunny Central Storage UP battery inverter temporarily stores the surplus solar power in the battery. It performs various grid support functions including frequency, voltage and reactive power control, and it can carry out a black start in the event that the grid collapses.

Why should you choose SMA Sunny central storage up battery storage system?

The SMA Sunny Central Storage UP battery storage system will increase the efficiency of your PV power plant. At the same time, battery storage systems perform important grid management functions. Grid frequency fluctuations are avoided thanks to smart plant control with the Power Plant Manager and grid voltage is restored in seconds.

Why should you choose a SMA energy storage system?

At night, the energy storage system is charged cost-effectively to cover consumption during the day. SMA storage solutions offer you further potential for maximizing the profit from your sustainable investment. AC-coupled systems are ideal when existing PV power plants are retrofitted with battery-storage systems.
