## What is the power of a 320kW inverter

What is a 320 kilowatt photovoltaic inverter?

With a rated power of 320 kilowatts, this inverter is suitable for large-scale photovoltaic power plants, effectively integrating the energy output of solar farms into the power grid.

**Product Description** This 320-kilowatt three-phase photovoltaic inverter employs advanced technology, offering high efficiency, stability, and reliability.

What is 320kw string photovoltaic inverter?

The 320kW String Photovoltaic Inverter from China factory is a 3-phase solar inverter for efficient energy conversion and management performance.

What is a goodwe UT 1500V series 320/350kw?

The UT 1500V Series (320/350kW) is GoodWe's new three-phase string inverter designed to increase the profitability of utility-scale projects. Offering options of 12 MPPTs and 15 MPPTs, this series comes with a maximum string input current of 15/20A, thus supporting bifacial 182mm/210mm module access.

What are the features of a power inverter 3000W?

Low frequency, low idle current, BTS cable, remote control. ? This power inverter 3000w requires 120VAC input and can provide 120VAC output power for the appliances, and it can output 50 or 60Hz via the SW4. ? AC/Battery Priority: Our inverter is designed with AC priority by default, you can choose the battery priority by SW5 switch.
