
What is the uninterruptible power supply standard in Kuala Lumpur

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is essential as it ensures that your devices will continue running in the event of power interruptions. CSPM's selection of fully integrated, end-to-end UPS systems are designed to efficiently protect your enterprise-wide networks, mission-critical systems and data centres from any power breakdowns.

Why should you choose CSPM Malaysia's uninterruptible power supply (UPS)?

Our technical experts are equipped to advise on projects both large and small, in a variety of complexities. CSPM Malaysia's Uninterruptible Power Supply (UPS) for data centres ensure reliable protection against power outages. Safeguard your machinery today.

What are uninterruptible power supply standards?

Uninterruptible power supply standards are established technical frameworks that define the minimum acceptable levels of safety, functionality, and efficiency for UPS systems. These standards are not arbitrary they are the result of decades of research, development, and practical field data gathered by industry experts, scientists, and engineers.

Who is responsible for enforcing uninterruptible power supply standards?

Multiple global and regional organizations are responsible for developing and enforcing uninterruptible power supply standards. Each body brings a unique focus, often catering to specific industries or geographies.
