
Where is the Huawei solar container communication station inverter in Moroni connected to the grid

How many solar inverters can be connected to ESS?

The grid-tied and off-grid ESS supports a maximum of three SUN2000- (2KTL-6KTL)-L1 inverters (with batteries) cascaded. In this scenario, the inverters can be connected to the grid only at the same phase and controlled only by a single-phase power meter. Grid connection at different phases or using a three-phase power meter is not supported.

How to ensure a stable data transmission with Huawei smart dongle?

1: To ensure stable data transmission, Huawei suggests 4G dongle to be installed in areas with stable mobile signal (2G signal ≥ 4 bars, 3G/4G signal ≥ 3 bars). 2: 3rd-party management systems shall match the communication protocol with Huawei Smart Dongle.

How to set APN mode in FusionSolar Huawei?

o By default, APN mode is set to Automatic. When this mode cannot be used to access the Internet, set the parameter to Manual. In this case, set the parameters related to the SIM card with the o Set Server to intl.fusionsolar.huawei.com and Port number to 27250. information obtained from the carrier.

How to connect SmartLogger to Huawei hosting cloud?

Set parameters for connecting the SmartLogger to the Huawei Hosting Cloud and click Submit. o Set Server to intl.fusionsolar.huawei.com and Port number to 27250. o Set Address mode to Logical address. If the communication address of the device address. In other cases, you must select Logical address.
