
Wholesale bess storage system in Malta

What is a battery energy storage system (BESS)?

Interconnect Malta Ltd. (ICM) has been entrusted the responsibility to implement two Battery Energy Storage Systems (BESS) to be connected to the Maltese National electric grid network. BESS is essentially a group of large batteries configured to store and dispatch electrical energy with very fast response when required.

What is a Bess system?

The BESS systems will enable the storage of surplus energy generated by photovoltaic panels during periods of low demand. This stored energy will then be used when demand peaks, helping to maintain the stability of Malta's electrical grid.

Why is the Bess project important for Malta?

Interconnect Malta divisional manager Joseph Vassallo said the BESS project was an important milestone for Malta as it would contribute to modernise its distribution network with the installation of large power-electronic converters connected to Malta's 33kV system for energy conversion and flexibility services.

Are Bess systems the key to modernizing Malta's distribution network?

She emphasized that initiatives like these are vital steps toward large-scale renewable projects, such as offshore wind. Dr. Ing. Joseph Vassallo, Divisional Manager at ICM, highlighted that the BESS systems are key to modernizing Malta's distribution network.

Battery energy storage systems (BESS) are increasingly vital in modern power grids and

industrial applications, offering enhanced energy reliability, efficiency, and sustainability.
